FOR IMMEDIATE RELEASE

**EZCheck Partners with RDM Corporation
New Accounts Receivable Conversion service features
ITMS Client and Host Processing System**

HOUSTON, July 8, 2004 – EZCheck® Check Services, Inc., a leading check conversion and authorization company, announced today that it has partnered with RDM Corporation (TSX: RC) to utilize the ITMS Client and Host Processing System for its new EZPayment Accounts Receivable Conversion service.

EZPayment,SM available this month, streamlines accounts receivable operations by capturing and converting personal check payments into electronic items that are then processed by EZCheck through the Automated Clearing House (ACH), with funds automatically deposited into the billing company's bank account within 48 hours.

RDM's ITMS Client and Host solution represents two essential components in the EZPayment process. ITMS Client consists of RDM's proprietary Windows®-based application and a MICR reader/imager linked to a personal computer to enable the digital capture of checks and associated remittance coupons. The ITMS Host component serves as a secure, web-centric, fully configurable administrative center that provides a powerful image management service as well as prepares and consolidates transactions in batches for processing.

"EZCheck has enjoyed a long-term relationship with RDM and they were the obvious choice when we began to explore options for the front-end technology we would rely upon for EZPayment," said Randy Rutledge, president and chief executive officer of EZCheck. "With EZPayment, EZCheck rounds out its suite of electronic check solutions and can now offer its partners and ISOs additional products to sell to new and existing customers," he added.

"RDM is dedicated to provide the most comprehensive and technologically advanced payment automation systems in the industry," said Tom Kettell, vice president of marketing for RDM Corporation. "ITMS is the culmination of RDM's experience and expertise in digital capture and image management and we are well-positioned with this product to serve EZCheck as their technology partner."

Payments to businesses and lockbox locations amount to nearly 20 billion personal checks annually, making accounts receivable conversion the fastest growing segment of the electronic check industry.

- M O R E -

The union of RDM's robust technology on the front end and EZCheck's expertise in processing and funds settlement on the back end creates a dynamic service that will revolutionize how businesses process and settle remittance payments. In addition, EZPayment is a cost-effective solution that improves the availability of funds, lowers deposit and return check fees and increases collection rates.

About EZCheck

EZCheck is a leading information and payment services company serving thousands of businesses nationwide in a wide variety of industries. As one of the initial pioneers in electronic check conversion at the retail point-of-sale, EZCheck has leveraged its advanced technology and systems to expand its product line into adjacent markets including accounts receivable conversion and recurring payments services. In addition, EZCheck provides a complete line of check guarantee, check verification and collection services to the retail community and is ranked among the top providers of check services in the country. EZCheck is dedicated to providing unsurpassed value and service to its customers. The company markets through a national network of independent sales organizations and supports operations from its headquarters in Houston, TX. For more information, please visit EZCheck's web site at www.ezchk.com.

About RDM Corporation

RDM Corporation is headquartered in Waterloo, Ontario and trades on the Toronto Stock Exchange under the symbol RC. RDM is a leading developer of specialized software and hardware products for electronic payment processing. RDM has pioneered electronic check conversion systems and web-based image and transaction management services for banks, retailers, payment processors and government agencies. RDM's newest offering is its innovative and proprietary Image and Transaction Management System (ITMS™) whereby transaction information can be remotely captured and processed electronically from distributed locations, freeing up significant customer float time and significantly reducing costs associated with returned checks. RDM holds an approximate 18% interest (13% on a fully diluted basis) in Xign Corporation, a California based provider of collaborative software for the financial supply chain. For further information, visit RDM's web site at www.rdmcorp.com.
