## **FOR IMMEDIATE RELEASE**

### **EZCheck Has Successfully Released *EZDeposit – Remote Deposit Capture***

**Houston, TX** – EZCheck an information and payment services company offering the most advanced check services in the industry including electronic check conversion, today announced they have successfully released *EZDeposit – Remote Deposit Capture*.

*EZDeposit – Remote Deposit Capture* allows organizations to process and deposit all types of paper checks remotely without having to physically take checks to the bank. By using *EZDeposit*, personal and corporate checks, travelers' checks, cashier's checks, and money orders received in person, via the mail or drop box locations can be captured and converted to electronic transactions for direct deposit into the recipient's bank account of choice.

"Banks across the nation are moving as fast as they can to offer remote deposit to their biggest and best customers. But none have historically been interested in offering payment processing or remote deposit capture to the middle market and smaller organizations," said EZCheck CEO Randy Rutledge. "Through *EZDeposit*, EZCheck offers its sales partners a turn-key remote deposit product that allows for both batch processing of hundreds of transactions a day through high-speed batch imagers or single-feed processing through check imagers already in the marketplace. These options have made selling and learning remote deposit much easier and more profitable for our agents and resellers."

*EZDeposit* single feed remote deposit capture works with an RDM EC 7011(f) double-sided, single pass imager or an RDM EC6011(f) single-sided, single pass imager combined with secure web-based software. Batch processing includes CAR/LAR technology to read the dollar amount off the face of the check when combined with high-speed imagers such as the Panini MyVision X or the TellerScan 230.

#### **About EZCheck**

EZCheck is a leading information and payment services company serving thousands of businesses nationwide in a wide variety of industries. As one of the initial pioneers in electronic check conversion at the retail point-of-sale, EZCheck has leveraged its advanced technology and systems to expand its product line into adjacent markets including remote deposit capture, back office conversion, accounts receivable conversion, recurring payments and checks by phone services. In addition, EZCheck provides a complete line of check guarantee, check verification and collection services to the business community and is ranked among the top providers of check services in the country. EZCheck is dedicated to providing unsurpassed value and service to its customers. The company markets through a national network of independent sales organizations and supports operations from its headquarters in Houston, TX.
