FOR IMMEDIATE RELEASE

EZCheck's New Products Offer Customers Added Accessibility and Affordability
New services leverage expertise in check authorization and collections technology.

HOUSTON, (APRIL 4, 2006) – EZCheck[®] Check Services, Inc., a leading check conversion and authorization company, announced today that it has introduced two new products that give merchant customers the ability to access their services more easily and cost-effectively.

EZApproval,SM enables businesses that conduct payment transactions remotely to access check guarantee and check verification services using any touch-tone phone – even wireless devices. No terminal or other equipment is required and businesses have access to the entire range of EZCheck's national check writer, bank account validation and account status databases. With EZApproval the merchant's ID is automatically recalled via phone number and a response is returned within seconds. EZApproval also guarantees payment so businesses can accept checks without risk.

"We developed EZApproval because we know that business takes our customers in many different directions and we wanted to make sure they had access to all of our services even when they are selling or servicing at a remote location," said Randy Rutledge, president and CEO of EZCheck. "This added accessibility and back-to-basics approach gives all types of remote businesses the ability to easily accept check payments without hassle and without risk."

EZCollect,SM offers an easy and convenient way to collect on non-sufficient funds (NSF) checks at no cost. With this program checks returned NSF are automatically directed from the business's bank to EZCheck for collection. The entire process is handled electronically and once the check is collected the merchant receives the full face value of the check via a monthly electronic deposit. EZCollect customers simply post a notice at each point-of-sale and write their merchant ID number on the face of the check before it is deposited. No check authorization is required with this program.

"Our new collection service enables us to provide a value-added service that is truly a win-win for both our customers and EZCheck," said Randy Rutledge, president and CEO of EZCheck. "We have perfected the use of electronic technology to collect and process NSF checks and this helps our customers avoid the difficulty associated with tracking down check writers and making collection calls."
